

41.237832N
88.197517W

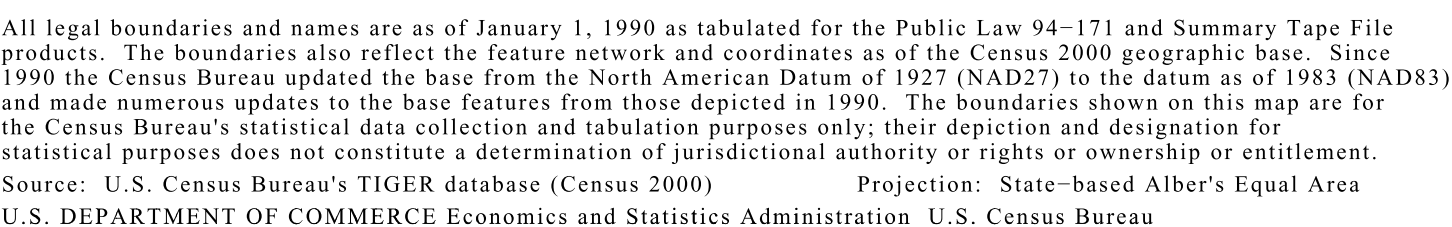

Figure 1 consists of two horizontal bar charts. The top chart is for a 4 m transect and the bottom chart is for a 7 km transect. Both charts show the distribution of the number of species per genus (0 to 4). The x-axis for both charts is labeled with values .4, .3, .2, .1, 0, and .4 m (for the top) or .7, .6, .5, .4, .3, .2, .1, 0, and .7 km (for the bottom). The bars are black and represent the proportion of genera with a given number of species. The 4 m transect shows a higher proportion of 0 and 1 species per genus compared to the 7 km transect, which shows a higher proportion of 2 and 3 species per genus.
